

## Front-end test

The test content includes the navigation bar and the prerequisite part of the course. Here is the procedure for manual testing.

- Header section - links and titles

When we start running the Study Planner, we first enter this page.

- The prerequisite of the unit course

This section will test that when the unit is dragged, a floating box with the prerequisites information for the course is displayed at the bottom of the page. We use the Master of Information Technology for the test.

This function has been implemented now, and the displayed data needs to be processed in the future to bring a better experience to users.
